QUESTION 12 OF 30 • CHOOSE ONE ANSWER

Your class has one week to create a model that shows how rainwater can be saved. What would you most naturally do first?

Imagine the situation:

Your teacher gives the team only basic craft materials and asks everyone to divide the work themselves.

☐ A Start building immediately and improve the model as ideas come.

☒ Ask questions, understand the goal, and sketch two or three possible approaches.

☐ C Wait for someone else to assign a clear task before participating.

☐ D Focus mainly on making the final model look attractive.

Pando's gentle tip

There are no “good” or “bad” answers. Choose what feels most like you—not what you think others expect.
